**Furniture Design** Nov 18 2022 Furniture Design is a comprehensive guide and resource for students and furniture designers. As well as discussing pioneering contemporary and historical designs, it also provides substantive answers to designers' questions about function, materials, manufacture and sustainability, integrating guidance on all of these subjects – particularly material and manufacturing properties, in one accessible and structured volume. Many leading contemporary furniture designers from around the world are included, with case studies carefully selected to highlight the importance of both material and manufacture-led design processes. The book is also intended to provide an insight into furniture design for those considering a university education in product and industrial design.

American Cottages May 20 2020 American Cottages is a pattern book of historic houses and floor plans published in 1883.

**Guerilla Furniture Design** Mar 18 2020 Build stylish and functional furniture from salvaged materials. This innovative guide presents dozens of strategies for upcycling scrap cardboard, metal, plastic, or wood into dependable shelving units, sturdy tables, and fun lamps. Alvar Aalto Mar 30 2021 Alvar Aalto (1898-1976) is the most prestigious Finnish architect of the last century, and the father of Nordic Modernism. He once said, God created paper for the purpose

of drawing architecture on it. Everything else is at least for me an abuse of paper. In the U.S. Aalto's critical reception began with his design for the Finnish Pavilion at the 1939 World Fair in New York: Frank Lloyd Wright described it as a work of genius. After World War II, Aalto also designed MIT's student dormitory. Prior to this, the architect's Paimio Sanatorium (1929) and Viipuri Library (1935), both in Finland, had already attracted international praise. He was also an outstanding town planner, painter and sculptor. Aalto's Modernism entailed the use of natural materials, warm colors, and undulating lines, and he is considered an important early exponent of Organic Design as a result. Of his design work outside of architecture, Aalto's vases, lamps, glassware and laminated bent-plywood furniture (pioneered and produced through the design company he co-founded, Artek) are equally esteemed. Iconic pieces include the Savoy Vase, the Paimio Chair and the Beehive Lamp. This monograph on Aalto's highly collectible furniture designs expands our understanding of the diverse abilities of this influential architect/designer.

**Design Secrets: Furniture** Jun 20 2020 New in Paperback! Furniture design is a complex art. Traditionally, techniques of the craft have been passed down from master to apprentice, but these days that is less and less the case in contemporary design. Students are now required to take courses and figure out much of it themselves. This book, as with others in the Design Secrets series, takes readers into the studio and reveals tips and techniques as well as the inspiration that brought the concept to life. Many graphic and product designers are crossing into furniture design, including Karim Rashid, a designer of product, space, light, and fashion, and Todd Oldham, a photographer, graphic designer, product designer, interior designer, and influence in film/video and TV. Oldham is now the star designer at Lazy Boy—a company that has experienced a remarkable rebirth and revamp. Design Secrets: Furniture shadows similar success stories by showcasing award-winning furniture designs from around the world. Each profile is complete with sketches,

notes, and interim iterations revealing how the final piece came to be.

**Mid-Century Modern** Dec 07 2021 The 1950's house was a scientific triumph, designed in a laboratory and tested on inhabitants of all ages before being built for the masses. Never had homes been so thoroughly contemporary, with antiques and period styles entirely banished. Mid-Century Modern explores the interior decor of this seminal decade, concentrating on all aspects of a home's decoration-walls, flooring, surfaces, lighting, and, of course, furniture. Case studies examine beautiful present-day homes that exhibit mid-century style in an exemplary way, and suggest ideas for taking the 1950's look-complete with collector's pieces-and mixing and matching it with elements from other eras.

**Millennium Modern: Living in Design Hb** Jan 16 2020 From artworks and chairs to architecture, landscaping and interior design, Michael Boyd's devotion to the principles of modernism is comprehensive. An artist and musician, he acquired his expertise as a collector, surrounding himself with rare and beautiful finds. His immersion in the philosophy and creativity of the masters inspired him to restore a succession of classic modern houses, curate exhibitions, create a versatile range of furniture and rugs, and design sculptural gardens. This book details his work across the first two decades of the new millennium and reflects his belief that the tenets of modernism - honesty and simplicity - developed more than a century ago, are equally relevant to our pluralistic age. This beautifully illustrated volume reveals Boyd's holistic design practice from his discovery of design classics in flea markets, to his own furniture designs, which feature in residential interiors, hotels and museums, through to his sensitive restoration of the houses by Paul Rudolph and Oscar Niemeyer, Richard Neutra and Craig Ellwood, and the sculptural landscapes he designed to enhance these residences, as well as masterpieces by John Lautner.

**Architecture and Interior Design from the 19th Century** Nov 06 2021 Exceptionally

comprehensive, this single-source reference provides a thorough examination of architecture, interiors, furniture and decorative arts from antiquity to the present. Flexible and easy-to-use, this well-organized text enables readers to content chronologically or topically and covers all aspects of architecture and design-from the built environment, to furniture, to decorative accessories. Using both narrative and illustrations, it interweaves design analysis language with art and architecture and offers a broad range of illustrations types including plans, sections and details. A companion to *Architecture and Interior Design Through the 18th Century: An Integrated History*, it provides a complete reference on design history for all.

**Facility Management** Oct 13 2019 From the moment it was first published, *Facility Management* became the ultimate reference for facility and design professionals who want to create a productive workplace that corresponds to the short- and long-term goals of their corporation. This Second Edition provides complete, fully up-to-date information and guidance on the evolving facility management profession that will help facility professionals and their service providers meet and exceed these goals.

For centuries, architects have turned their hand to custom furniture in a practice that has resulted in a number of iconic designs, including the timeless Eames Lounge and Ottoman and the ubiquitous Barcelona chair created by Mies van der Rohe for his acclaimed Barcelona Pavilion. Furniture by Architects beautifully illustrates bespoke design by some of the world's leading architects, who are increasingly designing furniture as clients seek interiors customised to specific needs. Foster + Partners' 520 Armchair for Walter Knoll has the texture and comfort found in a traditional leather armchair, while the Liquid Glacial Dining & Coffee Table by Zaha Hadid Design, made from polished clear Plexiglas, capture the spirit of her architecture, with their distinctive fluid lines, revealing the waves and ripples below the surface.

*Eileen Gray* Dec 27 2020 Neglected for most of her career, Eileen Gray (1878-1976) is now regarded as one of the most important furniture designers and architects of the early 20th century

and the most influential woman in those fields. Her work inspired both modernism and Art Deco. Eileen Gray was to "stand alone" throughout her career, first as a lacquer artist, then a furniture designer, and finally as an architect. At a time when other leading designers were almost all male and mostly members of one movement or another -whether a loose grouping like De Stijl in the Netherlands or a formal one such as the Congrès Internationaux d'Architecture Moderne-she remained staunchly independent. Her design style was as distinctive as her way of working, and Gray developed an opulent, luxuriant take on geometric forms and industrially produced materials used by the International Style designers, such as Le Corbusier, Charlotte Perriand and Mies Van der Rohe, who shared many of her ideals. Her voluptuous leather and tubular steel Bibendum Chair and clinically chic E-1027 glass and tubular steel table are now icons of the International Style. SELLING POINTS: \* In addition to an introductory essay, this book analyses the main designs of these key modern architects through sketches, drawings, photos of the original works, and shots of period settings \* A full illustrated chronology of all the featured works completes each volume. Reflecting the series' focus on design, special attention has been paid to the layout and binding, making these books designer objects in their own right. 180 illustrations

*Time-Saver Standards for Interior Design and Space Planning, Second Edition* May 12 2022 The "Silver Bible" -- thoroughly revised, updated and redesigned Interior designers, architects, and other design professionals can still turn to the field's beloved "Silver Bible" for a wealth of information related to the design and planning of residential and commercial interiors. *Masters & Their Pieces* Aug 03 2021 What makes a classic piece of furniture? Which living design is timelessly popular and always contemporary and why? 'Masters & their Pieces' presents the milestones of style of furnishings and their creators

*Mies Van Der Rohe* Nov 25 2020 The career and built works of this enigmatic and fascinating architect are carefully charted from his early work on housing design and high-rise offices in Berlin to his later and most famous work in Chicago, Detroit, Montreal and New York. Original illustrations from the architect's archives complement the excellent text. Spon's ARCHITECTURE COLLECTION presents the work of historic and contemporary masters of architecture in clear well-illustrated text, accessible to non-specialists. This appealing series of monographs, now available in English, is launched by books on two great historic figures of the century, Frank Lloyd Wright and Mies van der Rohe and two award-winning contemporary architects, Sir Norman Foster and Alvaro Siza.

**Furniture for Interior Design** Jan 28 2021 This comprehensive, practical guide explores how contemporary furniture is used within interior design to define a space, create division and

enclosure, and alter or redefine circulation. Initial chapters illustrate the different contexts in which furniture is used, from the office and domestic interiors to retail and exhibition space; look at types of furniture, whether off-the-shelf or bespoke; and explore the new vogue for recycling and vintage. Later chapters examine both traditional materials such as wood and the more unusual such as stone and glass, while also explaining new methods of manufacture – such as Computer Numerical Controlled and Selected Laser Sintering. The final chapter looks at how a design is developed, the site surveyed, prototypes made and specifications and schedules drawn up. Furniture for Interior Design is a detailed, highly illustrated guide to specifying and placing existing manufactured furniture, but also shows the reader how to design, detail, and commission batch-produced furniture or one-off, site-specific pieces.

**Mid-Century Modern – Visionary Furniture Design from Vienna** Jul 14 2022 In 1938, Vienna lost its best and most creative minds. This rupture was manifested in all of the arts and sciences and its mark is felt to this day – not least in the field of furniture design. With inexhaustible creativity the Jewish furniture designers who were forced to flee Vienna continued to work while in exile. They taught at the best universities and spread their ideas and vision throughout the entire world. Their creations became classics of twentieth-century furniture design, the epitome of mid-century modern style. This book honors the memory of the exiled designers with a thorough overview of their work. It details their life stories and their visionary designs, which remain as relevant and contemporary as ever, and brings to light new aspects of the history of Viennese furniture design.

**Woodworker's Guide to Furniture Design** Sep 16 2022 Written by a woodworker for fellow woodworkers, this book will teach how to get great designs out of readers' heads and into working drawings. They will create original furniture that is strong, attractive, and well-proportioned. Includes information on how to develop a design philosophy; how to apply standards of size, shape

and style; how to select the proper materials and tools; and more.

*Furniture Design and Construction for the Interior Designer* Jun 13 2022 Furniture Design and Construction for the Interior Designer satisfies the need in the interior design field for a source that teaches the aesthetic as well as the construction of residential furniture. Beginning chapters cover the design process as it relates to furniture design, basic materials, hardware, joinery, and finishes. Because interior designers organize and create livable spaces, later chapters are organized room by room, showing how pieces are constructed for a particular space. Understanding the basic construction of furniture greatly increases the success of the design. Interior designers should be confident in their design work as well as have an understanding of what is involved with the construction of their pieces, and that is what Natale and this book guide them toward.

*Fifties Furniture by Paul McCobb* Feb 26 2021 Today Paul McCobb's furniture and interior designs of the 1950s rank alongside Russell Wright, Gustav Stickley, and Heywood-Wakefield as marked staples in modern design. Paul McCobb's Directional Designs furniture line exhibits the low-cost, functional, and versatile furniture components, storage units, and interiors that earned McCobb the title of "America's decorator" during the mid-twentieth century. Containing over 100 coordinating room settings, including chairs, sofas, desks, benches, shelves, interiors, and much more, with information on McCobb's achievements and design principles, up-to-date price guide, and index, this book presents one of the backbones of modern design.

**Adaptations of Traditional Furniture in the Contemporary Home** Jul 22 2020 The purpose of

this study was to investigate the revival trends in furniture design during the period 1959-1969, and to understand the relationship of these adaptations to contemporary cultural objectives. An understanding of the design characteristics from the originals to the modern derivatives is useful for those who wish to select good design within their income range. There is virtually no information readily available to the consumer relative to the appropriate selection of adapted furniture designs for contemporary interiors. The problem is dealt with in five specific aspects: (1) to ascertain the influences that caused the adaptations of historical styles; (2) to analyze the dominant furniture designs and to determine whether they have been modified relative to authentic pieces, and if so, in what way; (3) to recognize the contemporary style; (4) to gain a perspective of the use of adaptations in contemporary interiors; and (5) to help establish a criterion on behalf of the consumer for better furniture selection. The information was obtained through the observation of general trends, not through a statistical method. A number of sources including newspaper and magazine articles, books, personal correspondence and furniture catalogs from individual manufacturing companies were studied. As a basis for analysis, a written description and photographic evidence were used documenting the characteristics of the adaptations to their originals and to a contemporary composition. One of the influences on the revival was the refurbishing of the White House during the early 1960's. Another is the need of manufacturers to produce two furniture collections each year for affluence in America has also given manufacturers and designers an enormous consumer market. The desire for traditional styles may also be reflected in the need to escape from the pressures of twentieth century living by seeking that security which many believe was associated with the time of their grandparents. In addition, due to a lack of understanding of contemporary design, the popularity of traditional adaptations may show a psychological reaction against contemporary furniture. An analysis of the data revealed that the

market offers furniture adaptations with influences dating back to Greek styling. Other general trends revert to the Renaissance period in Europe as well as the seventeenth, eighteenth and nineteenth centuries in Europe and America. In these adaptations the furniture designs tend to reflect characteristics, not the originals, of previous periods. The section in this thesis which deals with the use of the adaptations in contemporary interiors showed that some adaptations can accent contemporary interiors by introducing a totally unorthodox element and thus achieve variety. Stylized patterns and bright colors for upholstery fabrics add to that variety. If furniture is scaled down in size, or the details or motifs on the furniture are understated, the adaptations become more compatible with the simplicity of contemporary interiors. When viewed objectively, however, these adaptations have liabilities. The inference is that the designers who adapt furniture from previous periods do not appear to be fulfilling twentieth century needs of function and the objectives of honesty in design and materials. If these adaptations have to go into a contemporary format and a person believes that the furniture for an era should reflect that age, then the adaptations are not fulfilling contemporary cultural objectives. Historically each style of furniture was developed for a particular architectural structure and for the current needs of the people. In the same way, contemporary needs have altered the shape and purpose of rooms, and the furniture has to follow suit. However, the home furnishings market does not appear to reflect contemporary needs and designs. It is, instead, over-designed with traditional styles which are ill-adapted for twentieth century living.

**Industrial Arts Design** Nov 13 2019 "Industrial Arts Design" by William H. Varnum is a practical guide for designing in wood, clay, base, and precious metals. It is intended for individual student use in high schools, normal schools, and colleges and as a reference book for elementary school teachers. Its more complex problems are intended as definite help to the industrial art designer or

craftsman. The wood problems are treated with special reference to their adaptability to bench and cabinet work. The book has been written to fill a decided demand for a textbook that shall, without loss of time, directly apply well-recognized principles of general design to specific materials and problems encountered in the Industrial Arts.

It also features twenty-five case studies of furniture design that represent a broad selection of works, designers, and techniques, including recent designs produced within the last decade. The book explores: Furniture function and social use Form, spatial organization, and typological orders Structural integrity and composition Accessibility, universal design, human factors, and ergonomics The design process, from schematics through fabrication Materials, processes, and methods of fabrication Professional practice and marketing The history of furniture design, from prehistory to the digital age Complete with a glossary of terms and a comprehensive bibliography, Furniture Design, Second Edition is a one-stop resource that furniture designers will turn to regularly for the advice, guidance, and information needed to perform their craft.

**Atlas of Furniture Design** Feb 09 2022 In 2019, the Vitra Design Museum will publish the Atlas of Furniture Design, the definitive, encyclopedic overview of the history of modern furniture design. Featuring over 1700 objects by more than 500 designers and 121 manufacturers, it includes approximately 2800 images ranging from detailed object photographs to historical images

documenting interiors, patents, brochures, and related works of art and architecture. The basis for the Atlas of Furniture Design is the collection held by the Vitra Design Museum, one of the largest of its kind with more than 7000 works. The book presents selected pieces by the most important designers of the last 230 years and documents key periods in design history, including early nineteenth-century industrial furniture in bentwood and metal, Art Nouveau and Secessionist pieces and works by protagonists of classical modernism and postwar design, as well as postmodern and contemporary pieces. The Atlas of Furniture Design employed a team of more than 70 experts and features over 550 detailed texts about key objects. In-depth essays provide sociocultural and design-historical context to four historical epochs of furniture design and the pieces highlighted here, enriched by a detailed annex containing designer biographies, glossaries, and elaborate information graphics. The Atlas of Furniture Design is an indispensable resource for collectors, scholars and experts, as well as a beautifully designed object that speaks to design enthusiasts.
